### **Cornering the market with the Quad Sphere**

Home improvement and adding value to a property do not always go hand in hand; however, research has shown that by installing a second bathroom or ensuite can add up to 15% on the value of a home. The Quad Sphere from Manhattan's M3 range of enclosures is the perfect solution for additional bathroom application where space is at a premium, designed to fit into the tightest of corners and with an ingenious ergonomic shape that can accommodate even the most awkwardly positioned window. Mark Chatterton, Manhattans Senior Product Designer is thrilled with the results. "When designing the Quad Sphere we wanted to create an enclosure that would be practical for consumers who have limited space available. We took into account various scenarios where limited space would be a major factor, for example, en-suite areas, small bathrooms and the possibility of utilising both a bath and separate shower in a medium sized bathroom. As the door of the Quad Sphere slides rather than opens it is possible to fit a Quad Sphere, WC and sink comfortably into a room which measures just 2 metres x 2 metres - Amazing!"

The deceptively spacious Quad Sphere is available in a chrome or white finish.
